To Whom It May Concern:

It is my understanding (after speaking to John Trimmer) that your office will supply the emission source number for the incinerator and complete the more technical values concerning the air contaminants, emissions and fuel data. I am including reports obtained from Knox Farmer's Cooperative where we purchase our diesel fuel and from Southern Breeze, the manufacturer of the incinerator, in attempt to supply as much information as possible. The contact numbers of these businesses are (865) 922-2114 and 1-888-311-0131, respectively. You may reach me at (865) 992-3515.

Thank you,
Steven Helms
